Foreword	7
PART I. OUTLINE	9
1. Introduction	11
1.1. Opening remarks	11
1.2. Research aims	12
2. Background	15
2.1. Research of Western Alpine Neolithic cist graves	15
2.2. Archaeological context in the research area	22
2.3. Concepts of burial archaeology	26
3. Methods	31
3.1. Research area and geographical zones	31
3.2. Evaluation and choice of sites	33
3.3. Assessment approaches	34
4. Evaluated sites	37
4.1. Aosta Valley	37
4.2. Tarentaise Valley	54
4.3. Upper Rhône Valley	61
4.4. Lake Geneva, southern shore	79
4.5. Lake Geneva, northern shore	93
4.6. Swiss Plateau	104
4.7. Peripheral sites	146
PART II. RESULTS AND DISCUSSION	157
5. Radiocarbon dates of Western Alpine cist graves	159
5.1. Available radiocarbon data	159
5.2. Sampling strategy	165
5.3. Bone sample treatment	168
5.4. Results	170
6. Burial practices within Western Alpine cist graves	183
6.1. Spatial organisation of grave sites	183
6.2. Treatment of human remains	196
7. Grave goods within Western Alpine cist graves	201
7.1. Reported grave goods within the assessed sites	201
7.2. Origin of raw material	206
7.3. Typological evaluation	208
8. Discussion of results	219
8.1. Chronology and spread of Western Alpine cist graves	219
8.2. Evolution of burial practices within Western Alpine cist graves	228
8.3. Regionality and chronology of grave goods	232

PART III. CONCLUSION	237
9. Interpretative approach of Chamblandes-type cist graves	239
9.1. Proposing distinct funerary customs	239
9.2. Chamblandes-type cist graves beyond the Western Alps?	243
9.3. Social considerations	258
10. Synthesis	263
Acknowledgements	267
